DETAILED ACTION

1. Claims 53, 55-58, and 60-74 are pending and under consideration in this Office Action.
2. The rejection of claims 53, 55-58, and 60-74 under 35 U.S.C. 112, first paragraph, for lack of enablement stated in the previous Office Action dated 02/20/2004 has been withdrawn in view of applicants' claim amendments and arguments filed 07/23/2004.
3. The rejection of claims 53 and 55-72 under 35 U.S.C. 112, second paragraph, as being indefinite stated in the previous Office Action dated 02/20/2004 has been withdrawn in view of applicants' claim amendments and arguments filed 07/23/2004.
4. The rejection of claims 53, 56, 57, 58, and 72 under 35 U.S.C. 102(b) stated in the previous Office Action dated 02/20/2004 has been withdrawn in view of applicants' claim amendments and arguments filed 07/23/2004.

Claim Rejections - 35 U.S.C. § 112, 1st Paragraph

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:
The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
6. Claims 53, 55-58, and 60-74 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.
Applicants' arguments filed 07/23/2004 have been fully considered and are persuasive in part. Applicants' position is that accessory enzymes, glycosyltransferases, and product saccharides are adequately described in the specification. The Examiner respectfully disagrees for reasons of record as stated below.
Genus claims 53, 55-58, and 60-74 encompass accessory enzymes, glycosyltransferases, and product saccharides, where the scope of the claims includes many accessory enzymes and glycosyltransferases from many biological sources with differing amino acid sequences and

Art Unit: 1652

structures, and many product saccharides differing in structural, chemical, and physical characteristics.

The described transformed *E. coli* expressing a CMP-sialic acid synthetase/alpha 2,3-sialyltransferase fusion protein is used in the production of 3'-sialyllactose is not adequate to describe the full scope of the genus claims since the accessory enzymes and glycosyltransferases of the genus are expected to vary in amino acid sequence and structure, and there is no disclosure of a significant structural or functional element or property common to all members of the genus.

In view of these considerations, applicants have failed to sufficiently describe the claimed invention, in such full, clear, concise, and exact terms that a skilled artisan would recognize Applicants were in possession of the claimed invention.

Amending the claims to recite the specific amino acid sequence and identity of the fusion protein may overcome this rejection.

Conclusion

7. No claim is allowed.

8. **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
